

SPRAYMART Detergents

Pressure washer detergents...now in economical mix kits!

Spraymart mix kits contain formulas designed specifically for use with hot- and cold-water pressure washers. The mix kits are super concentrates that, when mixed with water, create a 55-gallon drum of detergent concentrate. The concentrate can then be diluted at a ratio of up to 150:1, depending on the product. When applied using a pressure washer, most pressure washers automatically dilute at a 15:1 ratio.

All six blends contain corrosion inhibitors so the detergent retains its stability inside a heating coil. Also, all are biodegradable with packaging that complies with U.S. and Canadian regulations.

Economical mix kits allow you to mix a dry powder or a powder with liquid in water to create 55 gallons of detergent concentrate.

All Purpose II

All Purpose II with Alcohol — A high-performance general purpose cleaner formulated to remove all types of dirt, grit, grease and soap scum. It is non-caustic, non-butyl, low-foaming with alcohol for extra effective cleaning of painted surfaces. Ideal for cleaning vehicles, building exteriors. **Dilution:** 120:1

Part No.	Description	LBS
112180	All Purpose II, 5 gal	45
